The Hussman Funds Letter to Shareholders

Dear Shareholder,

The Hussman Funds ended 2009 with moderate positive returns, reflecting a continued defensive investment stance and enduring concerns about economic fundamentals and credit risks. Both Funds have substantially outperformed their respective benchmarks since inception, while maintaining contained volatility.

For the year ended December 31, 2009, Strategic Growth Fund achieved a total return of 4.63%, compared with a total return of 26.46% in the S&P 500 Index. Since the inception of the Fund on July 24, 2000 to December 31, 2009, the Fund has achieved an average annual total return of 8.19%, compared with an average annual total return of -1.04% for the S&P 500 Index over the same period. An initial \$10,000 investment in the Fund on July 24, 2000 would have grown to \$21,029, as compared with \$9,063 if the same investment had been made in the S&P 500 Index.

For the year ended December 31, 2009, Strategic Total Return Fund achieved a total return of 5.84%, compared with a total return of 5.93% in the Barclays Capital U.S. Aggregate Bond Index. Since the inception of the Fund on September 12, 2002, the Fund has achieved an average annual total return of 7.52%, compared with an average annual total return of 4.91% for the Barclays Capital U.S. Aggregate Bond Index over the same period. An initial \$10,000 investment in the Fund on September 12, 2002 would have grown to \$16,980, as compared with \$14,195 if a similar investment had been made in the Barclays Capital U.S. Aggregate Bond Index.

The greatest challenge we have faced over the past year has been distinguishing two very different possible states of the world. One is a world in which our economic problems are largely solved, profits are on the mend, and things will soon be back to normal, except for a large number of unemployed people whose fate appears to be of remote concern to Wall Street. The other is a world that has enjoyed a brief intermission prior to a second wave of credit losses, and in which the range of policy choices will be more restricted because we have already issued an enormous volume of government liabilities, and will steeply debase our currency if we do it again. It is not at all clear that the recent data has removed any uncertainty as to which world we face.

Our defensive investment posture continues to be driven by concern that the present economic environment is more comparable to severe multi-year debt crises (which have periodically been observed throughout history) than it

Letter to Shareholders (continued)

is to previous run-of-the-mill post-war recessions. A number of specific concerns are detailed later in this letter. Major debt crises have rarely been resolved quickly, and while there is a clear tendency for the stock market to enjoy large recoveries from its initial losses, these advances also have typically been followed by abrupt and often steep failure. As of December 31, 2009, the S&P 500 Index would have to retreat by -17.26%, with Strategic Growth Fund unchanged, to eliminate the 2009 performance gap between the Fund and the S&P 500. Meanwhile, even with the recent market rebound, the Fund remains substantially ahead of the S&P 500 Index since the end of 2007.

The table below presents the total returns for Strategic Growth Fund and the S&P 500 Index since the inception of the Fund. In order to assist in attributing the effects of stock selection and hedging on the Fund, the table separately presents the returns of the stock positions and cash equivalents held by the Fund (after expenses), without the impact of hedging transactions. Notably, a portion of our hedge during 2009 was tied to the Russell 2000 Index and the NASDAQ 100 Index (as some investments owned by the Fund were best correlated with these indices). Both of these indices outperformed the S&P 500 Index in 2009, with particular strength in technology stocks. As a result, the total return of the S&P 500 during 2009 was smaller than the total return of the basket of market indices that we used to hedge the Fund's security holdings.

Year	HSGFX	Stocks Only	S&P 500
2000*	16.40%	4.86%	-9.37%

The investment objectives of the Hussman Funds are distinctly long-term and "full cycle" in nature, placing very little weight on tracking the market over short periods of time. Because of our emphasis on risk management, the Funds' returns will periodically behave differently than various market indices. The intent of our investment strategy is to outperform the major indices over the complete market cycle (bull and bear markets combined), with added emphasis on defending capital in unfavorable market conditions.

Strategic Growth Fund

For the calendar year ended December 31, 2009, Strategic Growth Fund achieved a total return of 4.63%. The Fund maintained a largely or fullyhedged investment stance during 2009, as the attractiveness of speculative "trend following" appeared insufficient in light of weak economic fundamentals, persistent structural credit risks, dull trading volume, strenuously overbought conditions, and ultimately overvaluation.

We entered 2009 well aware that historical credit crises have generally included sharp but temporary market recoveries after the initial crash (which are typically followed by fresh losses). In hindsight, I underestimated the extent to which Wall Street would respond to the ebb-and-flow in the economic data – particularly the predictable and temporary lull in the adjustable rate mortgage reset schedule between March and November 2009 – and drive

Letter to Shareholders (continued)

stocks to the point where they are now not only overvalued again, but strikingly dependent on a sustained economic recovery and the achievement and maintenance of record profit margins in the years ahead. Because our primary concern is to achieve long-term returns consistent with prudent risk management, there is no likelihood, even in hindsight, that I would have responded to purely speculative factors with more than a moderate exposure to market fluctuations last year. Still, there was clearly more room to speculate than I had expected, and our defensiveness during the later months of the year proved to be unnecessary, or at least too early.

From a stock-selection perspective, Strategic Growth Fund continues to emphasize companies and industries that exhibit strong stable revenue growth and profit margins, balance sheets generally having low levels of debt, and valuations that we view as favorable based on the long-term stream of cash flows that investors can expect to receive over time. The Fund's primary sector holdings remain in consumer-related goods, technology, and health care, with a continued avoidance of sectors that rely on credit expansion, such as financials and homebuilders.

Strategic Total Return Fund

For the calendar year ended December 31, 2009, Strategic Total Return Fund achieved a total return of 5.84%, compared with a total return of 5.93% in the Barclays Capital U.S. Aggregate Bond Index. In an environment of low and generally rising yields, the Fund achieved much of its gains last year through opportunistic trading of Treasury securities, beginning the year with a very small exposure to interest rate fluctuations, and increasing its exposure after interest rates had advanced substantially by mid-year.

Strategic Total Return Fund has the ability to hold up to 30% of its assets in alternatives to U.S. fixed income securities, including foreign government bonds, utility stocks and precious metals shares. Given that Strategic Total Return Fund seeks to preserve and enhance long-term purchasing power against inflation, precious metals have been an effective component of our investment strategy. As the prices of precious metals shares advanced, the Fund gradually liquidated the bulk of its holdings in these securities by yearend. More recently, the Fund has reestablished modest positions in precious metals shares on the price weakness observed during the first several weeks of 2010.

Letter to Shareholders (continued)

Portfolio composition and performance drivers

As of December 31, 2009, Strategic Growth Fund had net assets of \$5,448,326,267, and held 93 stocks in a wide variety of industries. The largest sector holdings as a percentage of net assets were in consumer discretionary (35.1%), information technology (31.7%), and health care (11.9%). The smallest sector weights were in materials (0.1%) and financials (0.5%).

The Fund's holdings of individual stocks as of December 31, 2009 accounted for \$4,909,240,920, or 90.1% of net assets. Against these stock positions, the Fund also held 33,500 option combinations (long put option, short call option) on the S&P 500 Index, 8,000 option combinations on the Russell 2000 Index and 3,000 option combinations on the NASDAQ 100 Index. Each option combination behaves as a short sale on the underlying index, with a notional value of \$100 times the index value. On December 31, 2009, the S&P 500 Index closed at 1,115.10, while the Russell 2000 Index and the NASDAQ 100 Index closed at 625.39 and 1,860.31, respectively. The Fund's total hedge therefore represented a short position of \$4,793,990,000, thereby hedging 97.7% of the dollar value of the Fund's long investment positions in individual stocks.

Though the performance of Strategic Growth Fund's diversified portfolio cannot be attributed to any narrow group of stocks, the following holdings achieved gains in excess of \$50 million during the semi-annual period ended December 31, 2009: NetApp and Amazon.com. Holdings with losses in excess of \$10 million during this same period were Synaptics and Research in Motion. For the full calendar year ended December 31, 2009, the Fund achieved gains in excess of \$50 million in Amazon.com, Aeropostale, NetApp, Netflix, Starbucks, Research in Motion, Cisco Systems and Humana. The Fund experienced a loss greater than \$10 million in General Electric, Sunpower, Citigroup, Martek Biosciences and Wal-Mart.

As of December 31, 2009, Strategic Total Return Fund had net assets of \$1,396,177,064. Treasury Inflation Protected Securities accounted for 8.5% of the Fund's net assets, with U.S. Treasury Bills, Notes and Bonds, representing an additional 70.1% of net assets. Exchange-traded funds, precious metals shares and utility shares accounted for 3.4%, 2.5% and 3.3% of net assets, respectively. The remaining 12.2% of net assets were in cash equivalents. The Fund carried a duration of approximately 4 years (meaning that a 1% change in interest rates would be expected to impact the Fund's asset value by about 4% on the basis of bond price fluctuations).

Letter to Shareholders (continued)

In Strategic Total Return Fund, during the semi-annual period ended December 31, 2009, portfolio gains in excess of \$2 million were achieved in Agnico-Eagle Mines, U.S. Treasury Inflation-Protected Note (2.625%, due 7/15/2017), U.S. Treasury Inflation-Protected Note (2.375%, due 1/15/2025), U.S. Treasury Inflation-Protected Note (2.00%, due 1/15/2016), DTE Energy, Barrick Gold and Cia De Minas Buena - ADR. Holdings with losses in excess of \$2 million were U.S. Treasury Note (3.375%, due 11/15/2019) and U.S. Treasury Note (3.625%, due 8/15/2019). For the full calendar year ended December 31, 2009, the Fund achieved gains in excess of \$3 million in U.S. Treasury Inflation-Protected Note (2.625%, due 7/15/2017), U.S. Treasury Inflation-Protected Note (2.00%, due 1/15/2016), U.S. Treasury Inflation-Protected Note (2.375%, due 1/15/2025), U.S. Treasury Inflation-Protected Note (2.375% due 4/15/2011), CurrencyShares British Pound Sterling Trust, Agnico-Eagle Mines, AngloGold Ashanti and U.S. Treasury Inflation-Protected Note (2.00%, due 7/15/2014). Holdings with losses in excess of \$2 million during this same period were U.S. Treasury Note (3.375%, due 11/15/2019), U.S. Treasury Note (2.75%, due 2/15/2019) and U.S. Treasury Note (3.625%, due 8/15/2019).

Present conditions

As we enter 2010, the most important headwinds facing the U.S. stock market are rich valuation and continuing credit risks. Market valuations are certainly better than they were at the market peak in 2000. However, the S&P 500 Index ended 2009 at valuations which are characteristic of those found at prior market peaks including 1972 and 1987. From such valuations, durable market returns have typically not emerged, so whatever merit there might be in accepting market risk is decidedly speculative and short-term.

While near term market returns are extremely difficult to project, it is possible to calculate fairly reliable projections of long-term total returns for the S&P 500, because over the long-term, stock prices track "smooth" fundamental measures such as revenues, cash flows, and normalized (cyclically-adjusted) earnings. For example, over the past century, S&P 500 earnings have fluctuated widely due to economic expansions and recessions, yet they have followed a very well-behaved growth trend when measured from peak-to-peak across economic cycles. One historically reliable method of projecting long-term market returns is to apply a reasonable range of price/earnings multiples to those future "normalized" earnings.

Letter to Shareholders (continued)

Even assuming that the long-term trend of S&P 500 earnings will remain intact despite deleveraging pressures and a continuing collapse in bank lending, we estimate that the S&P 500 is currently priced to deliver annual total returns averaging just 6.1% over the coming decade. This is certainly better than the similar calculation in 2000, which correctly projected a negative total return. Unfortunately, it is also the lowest projected return that has historically been observed outside of the late-1990's stock market bubble and a handful of previous market peaks such as 1987. This is not an argument that stocks must decline in the near-term, but it presents a difficult obstacle to risk-taking, because it suggests that further market advances may not be durable.

Meanwhile, the U.S. currently faces a predictable wave of resets on Alt-A and Option-ARM mortgages, of approximately the same size as the wave of sub-prime resets that ended in early 2009. These Alt-A and Option-ARM structures were specifically designed as "teasers" with low interest rates and temporarily optional principal payments – allowing loans to be made without documentation of creditworthiness, in return for post-reset interest terms that were generally higher than a documented lender would have paid. This "yield spread premium" tends to be particularly obnoxious at the point of reset if the mortgage itself is underwater (loan amount in excess of home value). Given that these mortgages were written during the last stages of the housing boom, at the highest prices, it is reasonable to assume that they now sport very high loan-to-value ratios. From our perspective, the combination of deeply underwater mortgages, tepid employment conditions, and a heavy mortgage reset schedule creates a large threat of further credit losses.

The loose-handed government bailout of financial institutions in early 2009 had the result of driving up the values of a wide variety of risky investments, driving the the yields of junk bonds and other low-grade debt to levels that existed in 2008, prior to the onset of major difficulties. While it might be considered natural for investors to bid up risky assets when they feel confident that the government will bail them out if they are incorrect, investors have now placed themselves in a position of relying on such bailouts, while at the same time earning low returns as compensation for the probable volatility.

Stagnant personal income and depressed corporate cash flows appear no more capable of servicing record amounts of debt today than they were at the beginning of this crisis. As a result, consumer credit and bank lending have continued to collapse, despite widespread perceptions of a fresh economic recovery. The depth of this collapse in credit is unprecedented in post-war

Letter to Shareholders (continued)

data. Historically, sustained economic expansions have commenced with rapid growth in debt-financed classes of spending such as housing, automobiles, durable goods, and capital spending. Recent economic growth has instead been driven primarily by temporary government stimulus, which has offset the erosion in private lending in recent quarters.

In the credit markets, the past two years have seen an enormous issuance of new government liabilities. The amount of U.S. Treasury debt held by the public (outside of agencies such as the Social Security Administration and the Federal Reserve) has already surged by more than 50%, from \$5.05 trillion to \$7.55 trillion, and record fiscal deficits continue to mount. Meanwhile, the Federal Reserve has expanded the U.S. monetary base from \$850 billion to \$2.02 trillion, fueled by aggressive purchases of Fannie Mae and Freddie Mac's mortgage-backed securities. As Fannie Mae and Freddie Mac have deeply insolvent balance sheets, their securities can be gradually made whole only with bailout funds obtained by issuing more U.S. Treasury debt.

It is in this context that we should consider inflation risks over the coming decade. At present, inflation risks are hardly considered to be problematic by Wall Street. From the standpoint of the next few years, that complacency is probably well founded, as fresh credit concerns are likely to create additional "safe haven" demand for default-free government liabilities. From a longer-term perspective, however, I believe that inflation will be a major event in the latter part of the coming decade, with the consumer price index roughly doubling over the next ten years.

While the near-term case for inflation hedges appears fairly weak, I expect that we will gradually accept greater exposure to commodities and inflation-protected securities in Strategic Total Return Fund in the coming years, particularly in response to occasional price weakness. Historically, inflation has been much better correlated with the growth of government spending than with the growth of the monetary base itself. This is particularly true over horizons of four years and beyond. Ultimately, a massive expansion in government liabilities can do little but undermine the value of the U.S. dollar relative to real goods and services.

Our willingness to accept market risk is essentially proportional to the expected return that we anticipate as compensation. Accordingly, we look to adopt a greater exposure to market risk when the expected return from accepting risk increases, or when the expected range of outcomes becomes

Letter to Shareholders (continued)

narrower. The past decade has been challenging in that the S&P 500 has delivered a great deal of volatility, but no net return at all. That environment has made it difficult to accept substantial market risk for any extended period of time. Presently, two things would improve this situation. One is clarity, the other is better valuation.

First and foremost, over the next few quarters, we are likely to discover the extent to which "second wave" credit risks materialize. It is not necessary for the nation to work through all of its economic problems in order for us to accept a constructive position. However, the most hostile market declines have often been associated with problems (overvaluation, credit strains) that were developing for some time but whose risks were dismissed or underestimated.

Presently, what we need most is for several latent problems to become more observable, so that we can have greater clarity about their extent. Among these are the likelihood of surging delinquencies tied to Alt-A and Option-ARM loans, the requirement beginning in January that banks and other financials bring "off balance sheet" entities onto their books, and clarity about the disposition of a mountain of mortgages that are already seriously delinquent, but where foreclosure has been temporarily delayed.

Improved valuations, combined with better clarity, can be expected to move us to a more constructive investment stance. I expect that we will resolve the "two states of the world" issue during the coming quarters, which itself will narrow the range of possible outcomes and – especially if prices retreat – allow us to accept greater amounts of risk in response to improvements in valuations and market action. I look forward to greater optimism as we move through 2010. In any event, I remain focused on our goal of outperforming the major indices over the complete (bull-bear) market cycle, while reducing the impact of periodic market losses. We continue to achieve our objective in that regard.

As always, I am grateful for your investment in the Funds, and for your trust.

Best wishes,

John P. Hussman, Ph.D.

December 31, 2009 (Unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Hussman Strategic Growth Fund and Hussman Strategic Total Return Fund (each, a "Fund", and collectively, the "Funds") are each a diversified series of Hussman Investment Trust (the "Trust"), which is registered under the Investment Company Act of 1940 as an open-end managment investment company. Each Fund is authorized to issue an unlimited number of shares. Hussman Strategic Growth Fund commenced operations on July 24, 2000. Hussman Strategic Total Return Fund commenced operations on September 12, 2002.

Hussman Strategic Growth Fund's investment objective is to provide longterm capital appreciation, with added emphasis on protection of capital during unfavorable market conditions.

Hussman Strategic Total Return Fund's investment objective is to provide long-term total return from income and capital appreciation, with added emphasis on protection of capital during unfavorable market conditions.

Securities and Options Valuation - The Funds' portfolio securities are valued at market value as of the close of regular trading on the New York Stock Exchange ("NYSE") (normally, 4:00 Eastern time) on each business day the NYSE is open. Securities, other than options, listed on the NYSE or other exchanges are valued on the basis of their last sale prices on the exchanges on which they are primarily traded. However, if the last sale price on the NYSE is different than the last sale price on any other exchange, the NYSE price will be used. If there are no sales on that day, the securities are valued at the last bid price on the NYSE or other primary exchange for that day. Securities traded on a foreign stock exchange are valued based upon the closing price on the principal exchange where the security is traded. Securities which are guoted by NASDAQ are valued at the NASDAQ Official Closing Price. If there are no sales on that day, the securities are valued at the last bid price as reported by NASDAQ. Securities traded in over-the-counter markets, other than NASDAQ quoted securities, are valued at the last sales price, or if there are no sales on that day, at the mean of the closing bid and asked prices. Values of foreign securities are translated from the local currency into U.S. dollars using currency exchange rates supplied by a pricing quotation service.

Pursuant to valuation procedures approved by the Board of Trustees, options traded on a national securities exchange are valued at prices between the closing bid and ask prices determined by Hussman Econometrics Advisors,

December 31, 2009 (Unaudited)

Inc. (the "Adviser") to most closely reflect market value as of the time of computation of net asset value. As of December 31, 2009, all options held by Hussman Strategic Growth Fund have been valued in this manner. Options not traded on a national securities exchange or board of trade, but for which overthe-counter market quotations are readily available, are valued at the mean of their closing bid and ask prices. Futures contracts and options thereon, which are traded on commodities exchanges, are valued at their daily settlement value as of the close of such commodities exchanges.

Fixed income securities not traded or dealt in upon any securities exchange but for which over-the-counter market quotations are readily available generally are valued at the mean of their closing bid and asked prices. Fixed income securities may also be valued on the basis of prices provided by an independent pricing service. The Board of Trustees will review and monitor the methods used by such services to assure itself that securities are appropriately valued. The fair value of securities with remaining maturities of 60 days or less may be determined in good faith by the Board of Trustees to be represented by amortized cost value, absent unusual circumstances.

In the event that market quotations are not readily available or are determined by the Adviser to not be reflective of fair market value due to market events or developments, securities and options are valued at fair value as determined by the Adviser in accordance with procedures adopted by the Board of Trustees. Such methods of fair valuation may include, but are not limited to: multiple of earnings, multiple of book value, discount from market of a similar freely traded security, purchase price of security, subsequent private transactions in the security or related securities, or a combination of these and other factors.

Accounting principles generally accepted in the United States ("GAAP") establish a single authoritative definition of fair value, set out a framework for measuring fair value and require additional disclosures about fair value measurement.

Various inputs are used in determining the value of each of the Fund's investments. These inputs are summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs
- Level 3 significant unobservable inputs

December 31, 2009 (Unaudited)

For example, options contracts purchased and written by Hussman Strategic Growth Fund are classified as Level 2 since they are valued at prices between the closing bid and ask prices determined by the Adviser to most closely reflect market value, pursuant to procedures approved by the Board of Trustees. U.S. Government Agency and Treasury obligations held by Hussman Strategic Total Return Fund are classified as Level 2 since values are based on prices provided by an independent pricing service that utilizes various "other significant observable inputs" including bid and ask quotations, prices of similar securities and interest rates, among other factors. Shares of money market funds are classified as Level 2 because their shares are valued at amortized cost, which approximates fair value absent unusual circumstances. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

The following is a summary of the inputs used to value each Fund's investments and other financial instruments as of December 31, 2009 by security type:

Hussman Strategic Total Peturn Fund

Each Fund's Schedule of Investments identifies the specific securities (by type of security and industry type) that comprise that Funds holdings within the Level 1 and Level 2 categories shown in the tables above.

Futures Contracts and Option Transactions – Hussman Strategic Growth Fund may purchase and write put and call options on broad-based stock indices. The Fund may also purchase and write call and put options on

December 31, 2009 (Unaudited)

individual securities. Hussman Strategic Total Return Fund may use financial futures contracts and related options to hedge against changes in the market value of its portfolio securities. The Fund may also purchase a foreign currency option to establish or modify the Fund's exposure to foreign currencies, or an interest rate futures contract to protect against a decline in the value of its portfolio.

The Hussman Strategic Growth Fund may use futures and options contracts for the purpose of seeking to reduce the overall investment risk that would otherwise be associated with the securities in which it invests. For example, the Fund may sell a stock index futures contract in anticipation of a general market or market sector decline that might adversely affect prices of the Fund's portfolio securities. To the extent there is a correlation between the Fund's portfolio and a particular stock index, the sale of futures contracts on that index could reduce general market risk and permit the fund to retain its securities positions.

When a Fund writes an index option, an amount equal to the net premium (the premium less the commission) received by the Fund is recorded as a liability in the Fund's Statement of Assets and Liabilities and is subsequently valued. If an index option expires unexercised on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or a loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold) and the liability related to such option will be eliminated. If an index option is exercised, the Fund will be required to pay the difference between the closing index value and the exercise price of the option. In this event, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Repurchase Agreements — The Funds may enter into repurchase agreements with certain banks or non-bank dealers. The value of the underlying securities collateralizing these agreements is monitored on a daily basis to ensure that the value of the collateral during the term of the agreements equals or exceeds the repurchase price plus accrued interest. If the bank or dealer defaults realization of the collateral by the Fund may be delayed or limited, and the Funds may suffer a loss if the value of the collateral declines.

Foreign Currency Translation — Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars based on exchange rates on the following basis:

December 31, 2009 (Unaudited)

A. The market values of investment securities and other assets and liabilities are translated at the closing rate on the London Stock Exchange each day.

B. Purchases and sales of investment securities and income and expenses are translated at the rate of exchange prevailing on the respective date of such transactions.

C. The Funds do not isolate that portion of the results of operations caused by changes in foreign exchange rates on investments from those caused by changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gains or losses on investments.

Reported net realized foreign exchange gains or losses arise from 1) purchases and sales of foreign currencies, 2) currency gains or losses realized between the trade and settlement dates on securities transactions and 3) the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books, and the U.S. dollar equivalent of the amounts actually received or paid. Reported net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities that result from changes in exchange rates.

Share Valuation and Redemption Fees — The net asset value per share of each Fund is calculated as of the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time) on each day that the NYSE is open for business. The net asset value per share of each Fund is calculated by dividing the total value of the Fund's assets, less its liabilities, by the number of its shares outstanding. The offering price and redemption price per share of each Fund is equal to the net asset value per share. However, shares of each Fund are generally subject to a redemption fee of 1.5%, payable to the applicable Fund, if redeemed within sixty days of the date of purchase. During the periods ended December 31, 2009 and June 30, 2009, proceeds from redemption fees totaled \$289,145 and \$1,924,023, respectively, for Hussman Strategic Growth Fund and \$141,659 and \$687,046, respectively, for Hussman Strategic Total Return Fund.

Investment Income – Interest income is accrued as earned. Dividend income is recorded on the ex-dividend date. Discounts and premiums on fixed income securities are amortized using the interest method.

Distributions to Shareholders — Dividends from net investment income, if any, are declared and paid annually to shareholders of Hussman

December 31, 2009 (Unaudited)

Strategic Growth Fund and are declared and paid quarterly to shareholders of Hussman Strategic Total Return Fund. Net realized short-term capital gains, if any, may be distributed throughout the year and net realized long-term capital gains, if any, are generally distributed annually. The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These "book/tax" differences are either temporary or permanent in nature and are primarily due to timing differences in the recognition of capital gains or losses for option transactions, losses deferred due to wash sales and treatment for foreign currency transactions.

The tax character of distributions paid during the periods ended December 31, 2009 and June 30, 2009 was as follows:

			Long-Term				
	Periods	Ordinary	Capital Total				
	Ended	Income	Gains	Distributions			
Hussman Strategic Growth Fund	12/31/09	\$ 7,151,672	\$ —	\$ 7,151,672			
	6/30/09	\$ 50,652,965	\$ 399,161,650	\$ 449,814,615			
Hussman Strategic Total Return Fund	12/31/09	\$ 25,403,409	\$ 3,621,173	\$ 29,024,582			
	6/30/09	\$ 14,043,798	\$ 8,158,480	\$ 22,202,278			

Securities Transactions — For financial statement purposes, securities transactions are accounted for on trade date. Gains and losses on securities sold are determined on a specific identification basis.

Common Expenses — Expenses of the Trust not attributable solely to one of the Funds are allocated between the Funds based on relative net assets of each Fund or the nature of the expense and the relative applicability to each Fund.

Accounting Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

Federal Income Tax — It is each Fund's policy to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. As provided therein, in any fiscal year in which a Fund so qualifies and distributes at least 90% of its taxable net income, the Fund (but not its

December 31, 2009 (Unaudited)

shareholders) will be relieved of federal income tax on the income distributed. Accordingly, no provision for income taxes has been made.

In order to avoid imposition of a Federal excise tax applicable to regulated investment companies, it is each Fund's intention to declare and pay as dividends in each calendar year at least 98% of its net investment income (earned during the calendar year) and 98% of its net realized capital gains (earned during the twelve months ended October 31) plus undistributed amounts from prior years.

The following information is computed on a tax basis for each item as of December 31, 2009:

	Hussman Strategic Growth Fund	Hussman Strategic Total Return Fund
Cost of portfolio investments and written call options	\$ 4,722,025,235	\$ 1,645,322,602
Gross unrealized appreciation Gross unrealized depreciation	\$ 1,022,827,978 (164,276,484)	\$ 17,932,674 (18,289,954)
Net unrealized appreciation (depreciation) Accumulated ordinary income (loss) PostOctober losses	\$ 858,551,494 (158,357) (648,333,130)	\$ (357,280) 1,015,980 (14,424)
Other gains (losses)	(840,646,618) (1,799,687) (632,386,298)	35,411,506 (1,012,458) \$ 35,043,324

The difference between the federal income tax cost of portfolio investments and the financial statement cost for the Funds is due to certain timing differences in the recognition of capital gains or losses under income tax regulations and GAAP. These "book/tax" differences are temporary in nature and are primarily due to option transactions, losses deferred due to wash sales and differing treatments of realized and unrealized gains and losses on exchange-traded funds taxed as grantor trusts.

Hussman Strategic Growth Fund and Hussman Strategic Total Return Fund had net realized capital losses of \$648,333,130 and \$14,424, respectively, during the period November 1, 2008 through June 30, 2009, which are treated for federal income tax purposes as arising during each Fund's tax year ending June 30, 2010. These "post-October" losses may be utilized in the current and future years to offset net realized capital gains, if any, prior to distributing such gains to shareholders.

December 31, 2009 (Unaudited)

For the six months ended December 31, 2009, Hussman Strategic Total Return Fund reclassified \$2,808,466 of accumulated net realized gains from security transactions against accumulated net investment income on its Statement of Assets and Liabilities due to differing treatments of realized gains and losses on exchange-traded funds taxed as grantor trusts. Such reclassification, the result of permanent differences between the financial statement and income tax reporting requirements, has no effect on the Fund's net assets or net asset value per share.

Each Fund recognizes the tax benefits or expenses of uncertain tax positions only when the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has reviewed each Fund's tax positions taken on Federal income tax returns for all open tax years (tax years ended December 31, 2006 through December 31, 2009) and has concluded that no provision for unrecognized tax benefits or expenses is required in these financial statements.

2. INVESTMENT TRANSACTIONS

During the six months ended December 31, 2009, cost of purchases and proceeds from sales and maturities of investment securities, other than short-term investments and U.S. government securities, amounted to \$1,972,991,119 and \$3,033,679,435, respectively, for Hussman Strategic Growth Fund and \$73,431,515 and \$169,217,870, respectively, for Hussman Strategic Total Return Fund.

3. TRANSACTIONS WITH AFFILIATES

One of the Trustees and certain officers of the Trust are affiliated with the Adviser or with Ultimus Fund Solutions, LLC ("Ultimus"), the Funds' administrator, transfer agent and fund accounting agent.

Advisory Agreement

Under the terms of an Advisory Agreement between the Trust and the Adviser, Hussman Strategic Growth Fund pays a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.95% of the first \$2 billion of its average daily net assets; 0.90% on the next \$3 billion of such assets; and 0.85% of such assets in excess of \$5 billion. Under the terms of a separate Advisory Agreement between the Trust and the Adviser, Hussman Strategic Total Return Fund pays the Adviser a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.50% of the first \$1 billion of its average daily net assets and 0.45% of such assets in excess of \$1 billion.

Hussman Investment Trust Notes to Financial Statements (continued)

December 31, 2009 (Unaudited)

Prior to July 13, 2009, Hussman Strategic Growth Fund paid a fee, which was computed and accrued daily and paid monthly, at annual rates of 1.00% of the first \$1 billion of its average daily net assets; 0.95% of the next \$2 billion of such assets; and 0.90% of such assets in excess of \$3 billion. Prior to July 13, 2009, Hussman Strategic Total Return Fund paid the Adviser a fee, which was computed and accrued daily and paid monthly, at annual rates of 0.55% of the first \$500 million of its average daily net assets; and 0.50% of such assets in excess of \$500 million.

Administration Agreement

Under the terms of an Administration Agreement, Ultimus supplies executive, administrative and regulatory services to the Trust, supervises the preparation of tax returns, and coordinates the preparation of reports to shareholders and reports to and filings with the Securities and Exchange Commission ("SEC") and state securities authorities.

Under the terms of the Administration Agreement, Ultimus receives a monthly fee from each Fund computed at annual rates of 0.075% of the Fund's average daily net assets up to \$500 million; 0.05% of the next \$1.5 billion of such assets; 0.04% of the next \$1 billion of such assets; 0.03% of the next \$2 billion of such assets; and 0.025% of such assets in excess of \$5 billion, subject to a per Fund minimum monthly fee of \$2,000.

Fund Accounting Agreement

Under the terms of a Fund Accounting Agreement between the Trust and Ultimus, Ultimus calculates the daily net asset value per share and maintains the financial books and records of the Funds. For these services, Ultimus receives from each Fund a monthly base fee of \$2,500, plus an asset-based fee computed at annual rates of 0.01% of the Fund's average daily net assets up to \$500 million and 0.005% of such net assets in excess of \$500 million. In addition, the Funds reimburse Ultimus for certain out-of-pocket expenses incurred in obtaining valuations of the Funds' portfolio securities.

Transfer Agent and Shareholder Services Agreement

Under the terms of a Transfer Agent and Shareholder Services Agreement between the Trust and Ultimus, Ultimus maintains the records of each shareholder's account, answers shareholders' inquiries concerning their accounts, processes purchases and redemptions of each Fund's shares, acts as dividend and distribution disbursing agent, and performs other shareholder service functions. For these services, Ultimus receives from each Fund a fee,

Hussman Investment Trust Notes to Financial Statements (continued)

December 31, 2009 (Unaudited)

payable monthly, of \$22 annually for each direct account and \$12 annually for certain accounts established through financial intermediaries, subject to a per Fund minimum fee of \$1,500 per month. For the six months ended December 31, 2009, such fees paid by Hussman Strategic Growth Fund and Hussman Strategic Total Return were \$776,947 and \$150,737, respectively. In addition, the Funds reimburse Ultimus for certain out-of-pocket expenses, including, but not limited to, postage and supplies.

For shareholder accounts held through financial intermediaries, the Funds may, in some cases, compensate these intermediaries for providing certain account maintenance and shareholder services, at an annual rate of not more than \$10 per account. During the six months ended December 31, 2009, Hussman Strategic Growth Fund and Hussman Strategic Total Return Fund paid \$716,051 and \$214,950, respectively, to financial intermediaries for such services.

Compliance Consulting Agreement

Under the terms of a Compliance Consulting Agreement between the Trust and Ultimus, Ultimus provides an individual to serve as the Trust's Chief Compliance Officer and to administer the Trust's compliance policies and procedures. For these services, the Funds pay Ultimus a base fee of \$1,000 per month, plus an asset-based fee computed at annual rates of .005% of the average value of their aggregate daily net assets in excess of \$100 million to \$500 million, .0025% of such assets from \$500 million to \$1 billion and .00125% of such assets in excess of \$1 billion. In addition, the Funds reimburse Ultimus for reasonable out-of-pocket expenses, if any, incurred in connection with these services.

4. OPTION CONTRACTS WRITTEN

Transactions in option contracts written by Hussman Strategic Growth Fund during the six months ended December 31, 2009 were as follows:

	Option Contracts	Option Premiums
Options outstanding at beginning of period	54,000	\$ 506,291,976
Options written	175,000	2,731,509,348
Options cancelled in a closing purchase transaction	(184,500)	(2,786,009,052)
Options outstanding at end of period	44,500	\$ 451,792,272

No contracts were written by Hussman Strategic Total Return Fund during the six months ended December 31, 2009.

Hussman Investment Trust Notes to Financial Statements (continued)

December 31, 2009 (Unaudited)

5. BANK LINE OF CREDIT

Hussman Strategic Growth Fund has an unsecured \$10,000,000 bank line of credit. Hussman Strategic Total Return Fund has an unsecured bank line of credit in the amount of \$2,000,000. Borrowings under these arrangements bear interest at a rate determined by the lending bank at the time of borrowing. During the six months ended December 31, 2009, the Funds did not borrow under their respective lines of credit.

6. CONTINGENCIES AND COMMITMENTS

The Trust's officers and Trustees are entitled to indemnifications from the Funds for certain liabilities that may arise from their performance of their duties to the Funds. Additionally, in the normal course of business the Funds enter into contracts that contain a variety of representations and warranties and which may provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown, as this would involve potential claims for indemnification for losses that may or may not be incurred in the future. However, based on experience, the Trust believes the risk of loss to be remote.

7. SUBSEQUENT EVENTS

The Funds are required to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed as of the date of the Statement of Assets and Liabilities. For nonrecognized subsequent events that must be disclosed to keep the financial statements from being misleading, the Funds are required to disclose the nature of the event as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. In addition, the Funds are required to disclose the date through which subsequent events have been evaluated. Management has evaluated subsequent events through the issuance of these financial statements on February 24, 2010 and has noted no such events. We believe it is important for you to understand the impact of costs on your investment. As a shareholder of the Funds, you incur two types of costs: (1) transaction costs, which may include redemption fees; and (2) ongoing costs, including management fees and other Fund expenses. The following examples are intended to help you understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds. A mutual fund's ongoing costs are expressed as a percentage of its average net assets. This figure is known as the expense ratio.

The examples below are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (July 1, 2009 – December 31, 2009).

The table on the following page illustrates each Fund's costs in two ways:

<u>Actual fund return</u> – This section helps you to estimate the actual expenses that you paid over the period. The "Ending Account Value" shown is derived from each Fund's actual return, and the third column shows the dollar amount of operating expenses that would have been paid by an investor who started the period with \$1,000 invested in that Fund. You may use the information here, together with the amount of your investment, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), and then multiply the result by the number given for the applicable Fund under the heading "Expenses Paid During Period."

<u>Hypothetical 5% return</u> – This section is intended to help you compare each Fund's ongoing costs with those of other mutual funds. It assumes that each Fund had an annual return of 5% before expenses during the period shown. In this case, because the return used is not each Fund's actual return, the results do not illustrate the actual expenses associated with your investment. However, the example is useful in making comparisons because the SEC requires all mutual funds to provide an example of fund expenses based on a 5% annual return. You can assess each Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other mutual funds. Note that expenses shown in the table are meant to highlight and help you compare ongoing costs only. The calculations assume no shares were bought or sold during the period. Your actual costs may have been higher or lower, depending on the amount of your investment and the timing of any purchases or redemptions.

More information about each Fund's expenses, including annual expense ratios for the past five years, can be found elsewhere in this report. For additional information on operating expenses and other shareholder costs, please refer to each Fund's prospectus.

Hussman Strategic Growth Fund

	Ending		
	Beginning	Account Value	Expenses
	Account Value	December 31,	Paid During
	July 1, 2009	2009	Period*
Based on Actual Fund Return	\$1,000.00	\$ 985.10	\$5.25
Based on Hypothetical 5% Annual			
Return (before expenses)	\$1,000.00	\$1,019.91	\$5.35

* Expenses are equal to Hussman Strategic Growth Fund's annualized expense ratio of 1.05% for the period, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

Hussman Strategic Total Return Fund

	Ending		
	Beginning	Account Value	Expenses
	Account Value	December 31,	Paid During
	July 1, 2009	2009	Period*
Based on Actual Fund Return	\$1,000.00	\$1,030.80	\$3.48
Based on Hypothetical 5% Annual			
Return (before expenses)	\$1,000.00	\$1,021.78	\$3.47

* Expenses are equal to Hussman Strategic Total Return Fund's annualized expense ratio of 0.68% for the period, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). A description of the policies and procedures the Funds use to determine how to vote proxies relating to portfolio securities is available without charge upon request by calling toll-free 1-800-HUSSMAN (1-800-487-7626), or on the SEC's website at http://www.sec.gov. Information regarding how the Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is also available without charge upon request by calling toll-free 1-800-HUSSMAN, or on the SEC's website at http://www.sec.gov.

The Trust files a complete listing of portfolio holdings for each Fund with the SEC as of the end of the first and third quarters of each fiscal year on Form N-Q. The filings are available upon request, by calling 1-800-HUSSMAN (1-800-487-7626). You may also obtain copies of these filings on the SEC's website at http://www.sec.gov. The Trust's Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

(Unaudited)

The Board of Trustees of Hussman Investment Trust, with the Trustees who are not "interested persons," as defined by the Investment Company Act of 1940, of the Trust (the "Independent Trustees") voting separately, have reviewed and annually approved the continuance of each Fund's Investment Advisory Agreement (the "Agreements") with the Adviser. The most recent approval of the Agreements took place at a meeting held on July 10, 2009, at which all of the Trustees were present in person.

The Independent Trustees were advised by independent counsel of their responsibilities in determining whether to approve the continuance of the Agreements, and the Independent Trustees requested such information from the Adviser as they deemed reasonably necessary to evaluate the terms of the Agreements and whether the Agreements continue to be in the best interests of the Funds and their shareholders. The Trustees reviewed: (i) the nature, extent and quality of the services provided by the Adviser; (ii) the investment performance of the Funds; (iii) the costs of the services provided and the profits realized by the Adviser from its relationship with the Funds; (iv) the extent to which economies of scale would be realized as the Funds grow; and (v) whether fee levels reflect these economies of scale for the benefit of the Funds' shareholders. The Trustees reviewed the background, gualifications, education and experience of the Adviser's investment professionals and support personnel. The Trustees also discussed and considered the quality of shareholder communications, administrative duties, and other services provided by the Adviser to the Trust, the Adviser's compliance program, and the Adviser's role in coordinating such services and programs. The Independent Trustees were advised and supported by independent counsel experienced in securities matters throughout the process. Prior to voting, the Independent Trustees reviewed the proposed continuance of the Agreements with management and also met in a private session with counsel at which no representatives of the Adviser were present.

The Adviser provided the Board with extensive information to assist the Trustees in analyzing both the absolute and risk-adjusted returns of the Funds over various periods. The Funds' returns were compared to the returns of relevant indices, similarly managed mutual funds, and other pooled investment vehicles. These analyses and comparisons showed that, since the inception of Hussman Strategic Growth Fund, the Fund's stock selection has substantially outperformed the returns of the S&P 500 Index and the Russell 2000 Index, and that the Fund's hedging strategies have generally been successful in

(Unaudited) (continued)

enhancing the total returns of the Fund while substantially reducing volatility. Based upon their review, the Trustees found that, since inception, Hussman Strategic Growth Fund has outperformed relevant securities indices with substantially less downside risk than a passive investment approach, and that certain more recent periods of moderated performance due to hedging have been consistent with the investment objectives of the Fund, and commensurate with the reduction in risk achieved. The Trustees, when reviewing the performance of Hussman Strategic Total Return, took note that during its period of operations, the Fund's average annual total return of 7.62% from inception on September 12, 2002 through June 30, 2009 compared favorably to the 4.69% return of the Barclays Capital U.S. Aggregate Bond Index.

In reviewing the advisory fees and total expense ratios of the Funds, the Trustees were provided with comparative expense and advisory fee information for mutual funds and other pooled investment vehicles, categorized both by fund size and by investment style. The Trustees took note of the fact that, since Hussman Strategic Growth Fund's inception, its effective advisory fee and its expense ratio have declined as a result of revised advisory fee breakpoints and economies of scale in certain expenses of the Fund. The Adviser and the Trustees agreed to an additional reduction in the advisory fee payable by Hussman Strategic Growth Fund, effective July 13, 2009. The Adviser offered this fee reduction, consistent with its prior fee initiatives, to lower expenses for the benefit of shareholders as the Fund grows. The advisory fee paid by Hussman Strategic Growth Fund had been calculated at the annual rates of 1.00% on the first \$1 billion of the Fund's average daily net assets, 0.95% on the next \$2 billion of such assets, and 0.90% on such assets in excess of \$3 billion. Effective July 13, 2009, the advisory fee was reduced to 0.95% on the first \$2 billion of the Fund's average daily net assets, 0.90% on the next \$3 billion of such assets, and 0.85% on such assets over \$5 billion. The Trustees concluded that, based upon the investment strategy and the long-term performance of Hussman Strategic Growth Fund, the advisory fees to be paid by the Fund are fair and reasonable. The Trustees noted that the fee revisions will result in an immediate reduction of more than \$1,000,000 annually in the advisory fees paid by Hussman Strategic Growth Fund, further resulting in a decline in the Fund's effective advisory fee ratio (based on the Fund's net assets at the time of the Board meeting) from 0.94% to 0.92%. It was noted that further growth in net assets of Hussman Strategic Growth Fund would result in even further decline in the effective advisory fee rate. It was the consensus of the Independent Trustees that the breakpoints

(Unaudited) (continued)

reflected in the new advisory fee schedule proposed by the Adviser are appropriate and allow Hussman Strategic Growth Fund to participate in economies of scale commensurate with asset growth.

At the Adviser's proposal, the Trustees also approved a reduction in the advisory fee payable by Hussman Strategic Total Return Fund to the Adviser, effective July 13, 2009. The advisory fee paid by Hussman Strategic Total Return Fund had been calculated at the annual rates of 0.55% on the first \$500 million of the Fund's average daily net assets and 0.50% on such assets in excess of \$500 million. Effective July 13, 2009, the advisory fee was reduced to 0.50% on the first \$1 billion of the Fund's average daily net assets and 0.45% on such assets over \$1 billion. The Trustees concluded that, based upon the investment strategy and the long-term performance of Hussman Strategic Total Return Fund, the advisory fees to be paid by the Fund are fair and reasonable. The Trustees noted that the fee revisions will result in an immediate reduction of more than \$250,000 annually in the advisory fees paid by Hussman Strategic Total Return Fund, further resulting in a decline in the Fund's effective advisory fee ratio (based on the Fund's net assets at the time of the Board meeting) from 0.525% to slightly less than 0.50%. It was noted that further growth in net assets of Hussman Strategic Total Return Fund would result in even further decline in the effective advisory fee rate. It was the consensus of the Independent Trustees that the breakpoints reflected in the new advisory fee schedule proposed by the Adviser are appropriate and allow Hussman Strategic Total Return Fund to participate in economies of scale commensurate with asset arowth.

The Trustees reviewed a recent balance sheet of the Adviser, a statement of the Adviser's revenues and expenses with respect to the Funds for the year ended December 31, 2008 and for the quarter ended March 31, 2009, and an analysis of the Adviser's profitability with respect to each Fund covering the years 2006, 2007 and 2008. The Independent Trustees concluded, with respect to each Fund, that the Adviser's profitability was not excessive given the high quality and scope of services provided by the Adviser and the longterm investment performance of the Funds. The Trustees also reviewed the Funds' brokerage costs and noted that the brokerage commissions negotiated by the Adviser on behalf of the Funds are significantly less than industry averages.

The Independent Trustees concluded that: (i) based on a careful review of the investment performance and risk characteristics of the Funds, the

(Unaudited) (continued)

effectiveness of the Funds in achieving their stated objectives, and the services provided by the Adviser, the Adviser has provided high quality services to the Funds; (ii) in their view, the nature of the services required by the Funds are broader and more sophisticated than those required by most investment companies because of the nature of the Funds' investment programs, which involve extensive risk-management activities; (iii) the effective advisory fee rate of 0.92% for Hussman Strategic Growth Fund, based upon current asset levels, compares favorably to the average advisory fees of 1.19% for other "longshort" funds, as categorized by Morningstar, and, when compared to hedge funds offering similar investment programs, the Fund is much less expensive; (iv) the effective advisory fee rate of 0.50% for Hussman Strategic Total Return Fund, based upon current asset levels, compares favorably to the average advisory fee of other funds of similar size investing in similar securities; (v) the scope and quality of services provided by the Adviser, which exceed the norm, support the appropriateness of the advisory fees payable by the Funds; (vi) each Fund has participated in economies of scale of expenses under its advisory fee structure and can be expected to realize further benefits through the new advisory fee breakpoints that have been proposed by the Adviser and can be expected to further lower the effective advisory fee rates of the Funds; (vii) Hussman Strategic Growth Fund has one of the lowest total expense ratios among funds classified by Morningstar as "long-short" funds, and the total expense ratio for Hussman Strategic Total Return Fund is less than the average for "conservative allocation" funds tracked by Morningstar; and (viii) the Adviser has adopted a brokerage placement policy which seeks to obtain best execution and low commissions on all of the Funds' brokerage transactions, and does not direct transactions to obtain "soft dollar" services, which has significantly benefited the Funds by reducing transaction costs (which are not reflected in the expense ratios) and increasing the investment returns of the Funds.

No single factor was considered in isolation or to be determinative to the decision of the Independent Trustees to approve continuance of the Agreements. Rather, the Trustees concluded, in light of a weighing and balancing of all factors considered, that the advisory fees payable by the Funds under the Agreements are fair and reasonable, and determined that it would be in the best interests of each Fund and its shareholders to renew the Agreements for an additional annual period.
